Assigning Issues

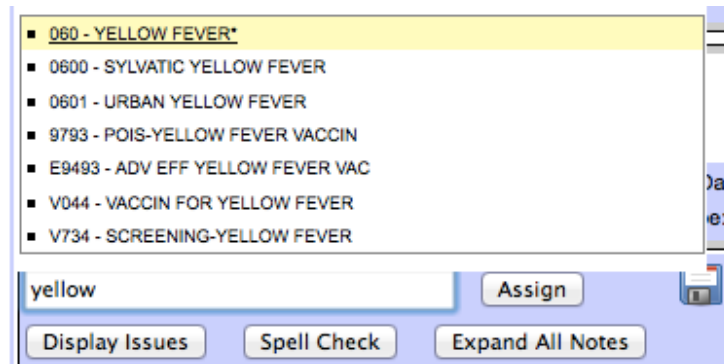

OSCAR allows you to assign “issues” to individual progress notes. The patient’s E-Chart will keep a record of these issues. It will also keep track of any issues that are marked as resolved.

I. Assign an Issue to a Patient

1. Open a patient’s E-Chart. To assign an issue, begin typing the name of the issue in the search box below the progress notes.

2. OSCAR will attempt to auto-complete your query. Click the issue to select it. Click Assign. The issue is now assigned to the patient.

3. If you make a mistake, click Display Issues to see all issues and click “delete” next to the name.
Note: Once an issue has been assigned to a progress note and saved, it cannot be deleted this way.

INDIVICA

4. On saving the progress note, it will show the assigned issue.

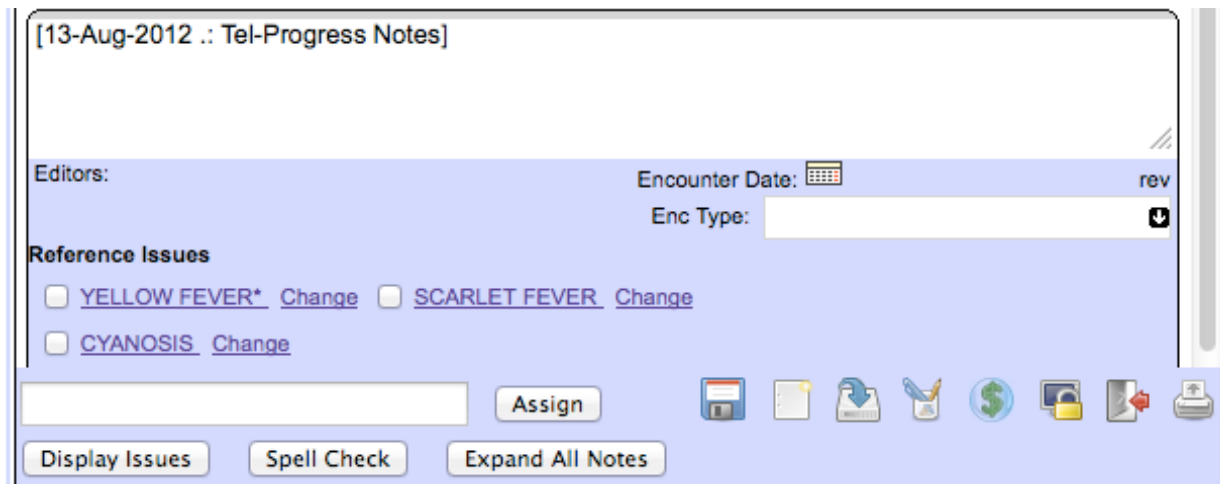

5. All issues will also appear on the right-hand column of the E-Chart under Unresolved Issues.
Note: Items under Unresolved Issues may not appear immediately and may require the E-Chart to be re-opened or refreshed.

II. Editing and Resolving Issues

1. Click on Display Issues. A list of all issues are shown.

INDIVICA

1. Click on the name of an issue to modify it. Select the appropriate option(s). Click on “Change” to confirm your change(s) to the issue.

III. Assigning Multiple Issues to a Progress Note

1. Click Display Issues to access all of a patient’s issues.
2. Use the checkboxes to denote which issues are to be assigned to the progress note.
Note: Follow steps 1-3 in Section I. *Assign an Issue to a Patient* to assign additional issues.
